

Garmin 249-00114-00 Silicone Rubber Tape
500°F / 260°C: FlameShield™ Silicone Rubber Self Fusing Compression & Stretch
Electrical Insulating Tape
High Temperature, Heat & Flame Resistant

- Garmin 249-00114-00 tape is supplied in red. Black also available but does not have a Garmin part number. Same tape characteristics and meets same specifications.
- Self-bonds / self fuses / self amalgamating. No sticky residue or adhesive when removed. Starts fusing upon contact, fully bonded within hours. Excellent cold weather performance. Makes an excellent compression tape.
- Used to protect wiring at the backshell clamp from clamping damage. Also provides equalization of strain relief.
- Used to build up the diameter of the wire bundle so that the cable clamp on the backshell will hold the wires in situations where too few wires would have resulted in the clamp not contacting the wires, resulting in strain on the connector's internal pins.
- Meets Mil-I-46852 / AA59163 and other proprietary specifications. Supplied with Certification.

FlameShield™ High Temperature Silicone Rubber Self Fusing Compression/Stretch Tape Garmin 249-00114-00
